Ansh Tiwatne

I am a first-semester B.Sc. Computer Science student at Universität des Saarlandes. I'm into building software (with some previous work experience as a developer). I also enjoy learning math, exploring open source projects, (and playing ultimate frisbee).

⚒️ PROJECTS

I'm constantly working on new projects which are usually open-sourced on GitHub –here are a few favorites:

- **DLRC Daily** – A short form news app (like Inshorts) developed for my school community, built in Next.js with a Firebase backend.
- **Prana Daan** – React app for managing registrations and automating processes for semiannual blood donation drives at Inspirit Vision.
- **Chalo Daudne** – React app for tracking runners, generating certificates and managing volunteers during biannual community marathons at Inspirit Vision.
- **DLRC Weather** – A Raspberry Pi weather station installed in my school that records and displays real-time weather data on a website.
- **Wordle Solver** – An efficient Wordle solving algorithm and scraper written in Python using Playwright, as a learning project.

👷 WORK EXPERIENCE

- **Software Developer @ NeuraSee LLP** **Jun 2025 - Oct 2025**
  Helped develop a web application that managed and visualized Magnetic Flux Leakage (MFL) data from Oil & Gas pipeline tests.
- **Computer Science Teacher @ DLRC Foundation** **Jun 2024 - Oct 2025**
  Having previously studied the A-level computer science syllabus early in high school, started teaching it to a small class of 2 peers interested during 12th grade. I organized classes 4 times a week. After I graduated, my school offered a part-time role (until I leaving for college) to teach the next batch.
- **Software Developer @ Inspirit Vision LLP** **Oct 2023 - Aug 2025**
  Built and deployed 4 full-stack web and mobile applications to support internal operations and company events, additionally built a service to schedule AWS EC2 servers. Worked with React (Next.js), TypeScript, AWS, Firebase, and PostgreSQL.

Recommendation Project Certificate

- **Tech Intern @ 1point01** **Apr 2022 - Jun 2022**
  Developed a website for a non-profit project that aimed to build a centralized and accessible directory for NGOs in my city.
  Certificate of Internship
- **Tech Intern @ WeShineTech Pvt. Ltd.** **Apr 2021 - May 2021**
  Created video tutorials and provided support to users for the company's services. Improved social media presence. Edited minor scripts. Made some improvements to their website.
  Internship Letter

💼 ADDITIONAL EXPERIENCE

- **App Developer & News Editor @ DLRC Foundation** **Jun 2022 - Dec 2024**
  Developed and published the DLRC Daily app as a platform for sharing short-form news and updates across our school community. Led a team of interns in publishing stories. Designed and helped compile our first school magazine.
  Letter of Appreciation
- **Physics Lab Intern @ DLRC Foundation** **Aug 2022 - Mar 2024**
  Prepared experiment setups for high school lab sessions. Organized and maintained lab instruments. Assisted in teaching experimental Physics. Created and performed demonstrations for school fairs. Mentored new lab interns.
  Letter of Appreciation
- **Math & Science Teaching Intern @ DLRC Foundation** **Aug 2022 - Oct 2022**
  Helped students with doubts. Checked tests and homework. Planned lab experiments for middle school Math and science classes.
  Letter of Appreciation

🖥️ LANGUAGES (computer)

- OCaml – intermediate
- Haskell – beginner
- Python – advanced
- JavaScript – advanced
- TypeScript – advanced
- Bash – intermediate
- HTML & CSS + Tailwind – advanced
- SQL – beginner
- Prolog – working knowledge

🌐 LANGUAGES (human)

- English – native
- German – beginner (studying)
- Hindi – proficient
- Marathi – native

🤹 SKILLS

- React + Next.js, Vite
- Linux
- Docker
- Firebase
- Git & GitHub

🤝 COMMUNITY SERVICE

- **Volunteer/Mentor @ Living Academy** **Jun 2024 - Oct 2025**
  Living Academy is an educational space for children in one of my city's most under-resourced areas. I taught basic science, programming, and mentored students in building hands-on STEM projects. Also seeing a similar need near my school, I created a parallel learning space using our campus during vacant hours, leading weekly sessions with another volunteer from August 2023 to Jan 2024. During my time between high school and college, I additionally volunteered to live on-site for over two months, helping manage operations, look after the students, and keep the place open 24/7.
- **Founder @ Sustainable Suds** **Jun 2024 - Dec 2024**
  Dissatisfied with amount of soap waste generated by hotels, founded a project to repurpose it. Partnered with four hotels and led two high school students that joined the initiative. Raised money selling soap for Samajbandh India.
- **Volunteer @ DLRC-DSS Program** **Feb 2022 - Apr 2022**
  Taught NCERT science syllabus online to a batch of 10+ middle school students weekly during government school closures. Planned and guided them through several at-home science experiments to keep students engaged through the lockdown.

📝 EDUCATION & TESTING

IGCSE (10th)
- Physics: A*
- Mathematics: A*
- Chemistry: A*
- Geography: A*
- Eng 2nd Lang: A*

AS Levels (11th)
- Physics: A
- Mathematics: A
- Chemistry: A
- Computer Science: A
- General English: A

A Levels (12th)
- Physics: A*
- Mathematics: A*
- Computer Science: A*

SAT (superscore): 1530/1600 Reading & Writing: 740, Math: 790

IELTS: overall band score 8

🌞 SUMMER PROGRAMS

- **Lodha Genius Programme** **May 2023 - Jun 2023**
  Admitted as one of 100 students across India into a fully funded month-long residential STEM program at Ashoka University. Studied math (number theory, geometry and combinatorics), astronomy and microscopy. Conducted two programming lessons (at microscopy professor's invitation). Made significant contributions and guided my teams in final science projects.
  Certificate Post
- **Light Touch Programme** **Jul 2023 - May 2024**

Online extension of the Lodha Genius Programme. Continued study of advanced math, astronomy, microscopy and picked up an additional quantitative biology module.

📚 ONLINE COURSES

- HarvardX: CS50's Introduction to Computer Science
- Google IT Support Professional Certificate
- System Administration and IT Infrastructure Services
- Crash Course on Python
- Using Python to Interact with the Operating System

⚽ EXTRACURRICULARS

- **Co-Founded HackDLRC** **Sep 2023 - Dec 2023**
  Launched a coding competition with a friend. Developed a platform for the competition in React. Reached out to sponsors, raising $14000 worth of awards. Designed posters and messages to promote the event to schools and communities. Authored several coding challenges. Organized an award ceremony.
- **Co-Led School's CS-Club** **Jun 2022 - Feb 2023**
  Organized classes biweekly. Taught computer fundamentals, Python basics, microprocessors and game development. Culminated each topic organizing a hands-on group project.
- **Ultimate Frisbee** **Jul 2023 - Nov 2023**
  Member of school's ultimate frisbee team. Participated in weekly practices. Competed in the West Regionals National School Ultimate Championship, securing 3rd place.

🏆 COMPETITIONS

- National School Ultimate Championship Certificate
- CS50x Puzzle Day 2024 Certificate
- CS50x Puzzle Day 2023 Certificate
- Google Code Jam 2023 Certificate
